

This is Bob. He uses cardboard combos.

Bob and his company fill 50 combos a day on average. They also have about 100 full combos in storage on any given day. During their peak season, the demand for cardboard combos rises by 50%.

They spend a significant amount of time reordering, assembling and disposing of cardboard combos. They have not wanted to switch to plastic bins because they believe cardboard is cheaper.

Total Cost Over 5 Years \$604,913

WORST SOLUTION

This is Mary. She uses inexpensive plastic bins.

Mary and her company shop for the cheapest price. Sometimes they save up to 25% up front compared to other bins on the market. Consequently, these bins crack and break. This creates a potential contamination problem, but they just replace the bins as needed.

They fill and store at the same levels that Bob's company does. They also experience the same peak demand. They need 338 plastic bins to handle their production.

Total Cost Over 5 Years \$281,672

BETTER SOLUTION

This is John. He uses long-lasting Remcon plastic bins.

John and his company will only buy Remcon plastic bins. They have bought the cheaper plastic bins in the past, and they have experienced the pain and additional costs that come from the never-ending cycle of cracking, breaking, and continual purchasing of replacement bins.

They fill and store at the same levels that Bob's and Mary's companies do. They also experience the same peak demand. They need 338 Remcon plastic bins.

Total Cost Over 5 Years \$214,241

BEST SOLUTION

Remcon plastic bins can make you a superhero.

Remcon plastic bins may cost more up front compared to cardboard combos and inferior plastic bins, but as John knows the way to save company money over the long-term is with durable Remcon plastic bins.

Who really saves the company money?

	Bob Cardboard combos	Mary Inexpensive plastic bins washed by hand	John Remcon plastic bins washed by hand
Total cost over 5 years	\$604,913	\$281,672	\$214,241
Total savings over 5 years	\$0	\$323,241	\$390,672 <i>Backed by Remcon's 5 year guarantee</i>
Total savings over 10 years	\$0	\$690,756	\$958,959 <i>Many Remcon customers have bins that last 10 or more years!</i>

Plus, making the switch to Remcon plastic bins today will also result in:

- Less purchasing activity
- Less receiving activity
- Less inbound freight
- Less waste
- Improved environmental impact
- Improved sanitation in your facility

"Remcon stands for quality and durability. They stand behind their products and help improve your bottom line. I tried another bin because it was cheaper, and it did not work at all. I went right back to Remcon."

-Tom Freimuth, Deli Brands of America

"You can always buy cheaper bins, but this Remcon bin will last you a long time. We've never thrown one away. You have to look at the long-term effect on your investment. We are very satisfied with the way they last and hold up."

-Jack Foulke, John F. Martin & Sons

"The biggest difference between the Remcon bins and the other bins I used is, first and foremost, the durability. You can see the quality, the thickness. They don't crack."

-Steven Feldhammer, Wonder Meats, Inc.
